

Diagram illustrating the relationship between Bleed Edge, Trim Edge, and Safe Area in a rectangular frame.

The diagram shows a large rectangle with three nested borders:

- BLEED EDGE** (Blue line): The outermost border, defining the total area including the bleed.
- TRIM EDGE** (Magenta line): The middle border, defining the area after the bleed is removed.
- SAFE AREA** (Green line): The innermost border, defining the area where content must be kept to avoid being cut off.
